ACADEMIC PROJECTS

BOOK4U – E-Commerce Platform

Frontend: HTML, CSS, Bootstrap, JavaScript

Backend: PHP

Database: MySQL

- Developed an e-commerce platform to manage books, customers, payments, deliveries, and billing efficiently.
- Centralized data to maintain inventory, customer records, transaction history, and stock details, reducing manual workload.
- Built a responsive user interface using HTML, CSS, Bootstrap, and JavaScript for a smooth user experience.
- Implemented backend functionalities with PHP and used MySQL for storing product and customer data.
- Enabled secure payment handling and integrated delivery tracking for smoother order fulfillment.
- Designed an admin module to manage book listings, stock updates, user data, and order processing in one place.
